

Learning objectives and Learning outcomes of the Subject Education

Learning objectives are brief statements that describe what students will be expected to learn by the course, unit, lesson, project, or class period.

Learning outcomes are statements of the knowledge, skills and abilities individual students should possess and can demonstrate upon completion of a learning experience or sequence of learning experiences.

Our students will follow a coherent course of study, which engages them academically and professionally, builds their self-confidence and develops their expertise in their subject. they will be supported throughout each level of their course and encouraged to reflect upon their learning experience alongside their academic, professional and personal development.

Our emphasis is upon transition, Contextualization, Independence, & Sophistication: enabling all students to understand, and meet, the challenges of learning within a college and supporting their success at the next levels of their course.
